About the Quick Start Guide

This Quick Start Guide describes basic functions of this unit.

For functions not described in this Guide, refer to the Instruction Manual stored in the enclosed CD-ROM.

To refer to the Instruction Manual, a browser such as Internet Explorer® 7 or later, Firefox® 3.6 or later, Chrome™ 20 or later, Safari® 5.1 or later, iOS Safari® 4.0 or later, or Android™ 2.2 or later is required.

The Instruction Manual is subject to change for modification of specifications, etc. The latest Instruction Manual can be downloaded from the following website:

manual.jvckenwood.com/edition/im369/

The illustrations of the display and panel appearing in this manual are examples used to explain more clearly how the controls are used. Therefore, what appears on the display in the illustrations may differ from what appears on the display on the actual equipment, and some of the images on the display may be inapplicable.

CAUTION

- Keep battery out of reach of children and in original package until ready to use. Dispose of used batteries promptly. If swallowed, contact a physician immediately.
- The battery pack or batteries shall not be exposed to excessive heat such as sunshine, fire or the like.
- Do not set the remote control in hot places such as on the dashboard.
- The Lithium battery is in danger of explosion if replaced incorrectly. Replace it only with the same or equivalent type.

Before use

▲ WARNING

To prevent injury or fire, take the following precautions:

- Stop the car before operating the unit.
- To prevent a short circuit, never put or leave any metallic objects (such as coins or metal tools) inside the unit.

▲ CAUTION

- Adjust the volume so that you can hear sounds outside the car. Driving with the volume too high may cause an accident.
- Wipe off the dirt on the panel with a dry silicon or soft cloth.
Failure to observe this precaution may result in damage to the monitor or unit.*

Condensation

When the car is air-conditioned, moisture may collect on the laser lens. This may cause disc read errors. In this case, remove the disc and wait for the moisture to evaporate.

Notes

- If you experience problems during installation, consult your Kenwood dealer.
- When you purchase optional accessories, check with your Kenwood dealer to make sure that they work with your model and in your area.
- Characters that conform to ISO 8859-5 or ISO 8859-1 can be displayed. Refer to "RUSSIAN SET" of <11-6. Initial settings>(Instruction Manual).
- The Radio Data System feature won't work where the service is not supported by any broadcasting station.

About discs used with this unit

- This unit can only play the CDs with 
- The following discs cannot be used:
 - Discs that are not round
 - Discs with coloring on the recording surface or discs that are dirty
 - Recordable/Rewritable disc that has not been finalized (For the finalization process, refer to your disc writing software, and your disc recorder instruction manual.)
 - 8 cm (3 inch) disc (Attempt to insert using an adapter can cause malfunction.)

Handling discs

- Do not touch the recording surface of the disc.
- Do not stick tape etc. on the disc, or use a disc with tape stuck on it.
- Do not use any accessories for the disc.
- Do not use any solvents to clean discs. Use a dry silicon or soft cloth.
- Clean from the center of the disc and move outward.
- When removing discs from this unit, pull them out horizontally.
- Remove the rims from the center hole and disc edge before inserting a disc.

How to reset your unit

If the unit fails to operate properly, press the Reset button. The unit returns to factory settings.

Press the **[]** button.

Disconnecting a call

Press the **[]** button.

Installation accessories

Installation Procedure

1. To prevent a short circuit, remove the key from the ignition and disconnect the \ominus battery.
2. Make the proper input and output wire connections for each unit.
3. Connect the speaker wires of the wiring harness.
4. Connect the wiring harness wires in the following order: ground, battery, ignition.
5. Connect the wiring harness connector to the unit.
6. Install the unit in your car.
7. Reconnect the \ominus battery.
8. Press the reset button.

Before Installation

▲WARNING

- The unit can only be installed in a car with a 12V DC power supply, negative ground.
- If you connect the ignition wire (red) and the battery wire (yellow) to the car chassis (ground), you may cause a short circuit, that in turn may start a fire. Always connect those wires to the power source running through the fuse box.

▲CAUTION

- Mounting and wiring this product requires skills and experience. For safety's sake, leave the mounting and wiring work to professionals.
- Make sure to ground the unit to a negative 12V DC power supply.
- Do not install the unit in a spot exposed to direct sunlight or excessive heat or humidity. Also avoid places with too much dust or the possibility of water splashing.
- Do not use your own screws. Use only the supplied screws. Using wrong screws, could damage the unit.
- If the power is not turned ON ("PROTECT" is displayed), the speaker wire may have a short-circuit or touched the chassis of the vehicle and the protection function may have been activated. Therefore, the speaker wire should be checked.
- If your car's ignition key switch does not have an ACC position, connect the ignition wires to a power source that can be turned on and off with the ignition key. If you connect the ignition wires to a constant-voltage power source, as with battery wires, the battery may die.
- If the console has a lid, make sure to install the unit so that the faceplate will not hit the lid when it is closed or opened.
- If the fuse blows, first make sure the wires are not touching other parts to cause a short circuit, and then replace the old fuse with one with a new the same rating.
- Insulate unconnected wires with vinyl tape or other similar materials. To prevent a short circuit, do not remove the caps on the ends of the unconnected wires and terminals.
- Connect the speaker wires correctly to the corresponding terminals. The unit may be damaged or fail to work if you share the \ominus wires or ground them to any metal part in the car.
- When connecting only two speakers, connect the connectors either to both of the front output terminals or to both of the rear output terminals (do not mix front and rear terminals). For example, if you connect the \oplus connector of the left speaker to a front output terminal, do not connect the \ominus connector to a rear output terminal.

Connecting Wires to Terminals

Connecting the ISO Connector

The pin arrangement for the ISO connectors depends on the type of the car. Make sure to make the proper connections to prevent damage to the unit.

The default connection for the wiring harness is described in [1] below. If the ISO connector pins are set as described in [2], make the connection as illustrated.

Please be sure to reconnect the cable as shown [2] below to install this unit to the **Volkswagen** vehicles etc.

[1] (Default setting) The A-7 pin (red) of the vehicle's ISO connector is linked with the ignition, and the A-4 pin (yellow) is connected to the constant power supply.

[2] The A-7 pin (red) of the vehicle's ISO connector is connected to the constant power supply, and the A-4 pin (yellow) is linked to the ignition.

- After the installing the unit, check whether the brake lamps, blinkers, wipers, etc. on the car are working properly.
- Mount the unit so that the mounting angle is 30° or less.
- Reception may become poor if there are metal objects near the Bluetooth antenna. (DPX405BT only)

Bluetooth antenna unit

For Good Reception

To assure good reception, note the following:

- Communicate with the cell-phone within the line-of-sight distance of 10 m (30 ft). The communication range becomes shorter depending on the surrounding environment. The communication range also becomes shorter when there is an obstacle between this unit and the cell-phone. The above maximum communication range (10 m) is not always assured.
- A broadcast station or walkie-talkie located nearby can interfere with communication due to a too strong signal.

⚠ CAUTION

Install this unit in the console of your vehicle. Do not touch the metal parts of this unit during and shortly after use of the unit. Metal parts such as the heat sink and enclosure become hot.

Installing the trim plate/ Installation

Installing the trim plate

Attach Accessory ② to the unit.

Installation

Bend the tabs of the mounting sleeve with a screwdriver or similar utensil and attach it in place.

- Make sure that the unit is installed securely in place. If the unit is unstable, it may malfunction (for example, the sound may skip).

Removing the Unit

Removing the trim plate

- 1 Engage the catch pins on the extraction key (Accessory ③) and remove the two locks on the lower level. Lower the frame and pull it forward as shown in the figure.

- The frame can be removed from the top side in the same manner.
- 2 When the lower level is removed, remove the upper two locations.

Installing the Microphone unit

Removing the Unit

- 1 Remove the trim plate by referring to the removal procedure in the section <Removing the trim plate>.
- 2 Insert the two extraction keys (Accessory ③) deeply into the slots on each side, as shown.

- 3 Lower the extraction key toward the bottom, and pull out the unit halfway while pressing towards the inside.

- Be careful to avoid injury from the catch pins on the extraction key.
- 4 Pull the unit all the way out with your hands, being careful not to drop it.

- 1 Check the installation position of the microphone (Accessory ④).
- 2 Remove oil and other dirt from the installation surface.
- 3 Install the microphone.
- 4 Lay the cable up to the unit with it secured at several positions using tape or the like.

- Install the microphone as far as possible from the cell-phone.

Fix a cable with a commercial item of tape.

Peel off the release coated paper of double-face adhesive tape to secure the microphone on the place shown above.

Adjust the direction of the microphone to the driver.

Information on Disposal of Old Electrical and Electronic Equipment and Batteries (applicable for EU countries that have adopted separate waste collection systems)

Products and batteries with the symbol (crossed-out wheeled bin) cannot be disposed as household waste.

Old electrical and electronic equipment and batteries should be recycled at a facility capable of handling these items and their waste byproducts. Contact your local authority for details in locating a recycle facility nearest to you.

Pb

Proper recycling and waste disposal will help conserve resources whilst preventing detrimental effects on our health and the environment.

Notice: The sign "Pb" below the symbol for batteries indicates that this battery contains lead.

The marking of products using lasers

The label is attached to the chassis/case and says that the component uses laser beams that have been classified as Class 1. It means that the unit is utilizing laser beams that are of a weaker class. There is no danger of hazardous radiation outside the unit.

Requirements Aha™:

Requirements for listening to the Aha™ are as follows:

iPhone or iPod touch

- Use an Apple iPhone or iPod touch running iOS4 or later.
- Search for "Aha" in the Apple iTunes App Store to find and install the most current version of the Aha™ application on your device.
- iPhone/ iPod touch connected to this unit with a KCA-iP102.

Android™

- Use Android OS 2.2 or later.
- Download the Aha™ application to your smartphone from the Google play.
- Bluetooth must be built in and the following profiles must be supported.
 - SPP (Serial Port Profile)
 - A2DP (Advanced Audio Distribution Profile)

NOTE

- In the application on your device, log in and create a free account with Aha.
- Internet connection by 3G, LTE, EDGE, or WiFi.
- Because Aha™ is a third-party service, the specifications are subject to change without prior notice. Accordingly, compatibility may be impaired or some or all of the services may become unavailable.
- Some Aha™ functionality cannot be operated from this unit.
