IMPORTANT SAFETY INSTRUCTION

About the Product

- Please do not install the product in places that may cause interference while driving.
- Please do not install the product in a highly humid environment.
- Due to high temperatures during summer, please do not expose the product to long period of time, because it may reduce the product's lifespan.
- Please avoid fierce impact upon the product.
- If the unit is damaged or malfunctions, don't open it and don't attempt to repair it. Please contact DOD or DOD authorized local dealer.

About the car charger

- Only use the car charger provided by manufacture, others might cause malfunctions or danger.
- To avoid damage, please do not constantly plug in and remove the car charger.
- Ensure it is connected to a proper power source. The voltage requirements are described on the car charger.
- Please do not touch the car charger with wet hands.
  If the car charger is damaged, it should be replaced immediately. Please do not try to fix it on your own.

About the Battery

- Only use the battery approved by the manufacturer.
- There is a built-in battery, please avoid usage in high-temperature environments.
- Please keep the device dry and store it at lower temperature if it is not in use. When the device couldn't be turned on, please connect to power supply for a few minutes before turn on the device.

Autogood products «130»

INTRODUCTION OF OTHER FUNCTIONS

- **Loop Recording (default)**
  Loop Recording can be set at 2/3/5 minutes, it means that the video clip intervals will be set at 2/3/5 minutes long and after memory card is full, the oldest video clips will be deleted and new video clips will take its place.
  If Loop Recording is turned off, it will stop recording when the memory card is full.

- **G-Sensor (default at Middle)**
  When the internal G-Sensor detects situations like an impact, intense bumps or hard brakes during Recording Mode, the unit will automatically lock the current recording to avoid being replaced by loop recording.

- **Motion Detection**
  In Motion Detection Mode, the surrounding of where the car is parked will be recorded taking the least amount of storage space. Recording will automatically be turned off after 10 seconds if nothing happens during the monitor mode. Once there is movement, the unit will start recording immediately.
  * The Motion Detection Mode requires the camera to be connected to a constant power supply.
  When Motion Detection Mode is activated, Monitor Mode/Emergency Recording Mode and the G-Sensor function will automatically be turned off.

- **Plate Stamp**
  Enter your license plate number or desired input, and it will be displayed on the video footage.

130.com.ua

ADDITIONAL INFORMATION

HOW TO PLAYBACK ON COMPUTER

If the camera you purchased with GPS logger, please download the DOD GPS player with the CD-ROM (included), or go to http://www.dod-tec.com/ to download and install the DOD GPS player.

If the camera you purchased without GPS logger, please go to http://www.videolan.org/vlc/ to download and install the VLC PLAYER.

HOW TO PLAYBACK ON OTHER DEVICES

There are AV OUT and HDMI OUT slots on the unit for Playback Mode Please plug the AV or HDMI cable to the unit and connect the other end to the video/ audio equipment.

* It requires the camera to be connected to a constant power supply.

FIRMWARE UPGRADE

Please visit DOD Tech official website (http://www.dod-tec.com) to download the latest firmware for your unit. Before download the updated firmware, please navigate to the System Menu and select “Version” to view the current firmware version.

- Connect the micro SD card into the computer.
- Access DOD Tech website (http://www.dod-tec.com) to download the latest software to the SD Card.
- Insert the micro SD card to the unit
- Connect the unit with the external power supply*. The unit will automatically turn on, and running about 40 seconds for firmware upgrading.
- The unit will automatically reboot once finished the firmware update.
- Be sure to format the SD memory card once finished firmware update.

* *Recommend connecting the unit with the external power supply instead of using the built-in battery, it might cause the firmware update failure due to power interruption.*
