Instruction manual

Руководство по эксплуатации

P R E M I U M Q U A L I T Ä T F Ü R A U T O M O B I L E

Description

1. Air inlet
2. Dust-box
3. Dust-box lock button
4. ON/OFF Switch
5. Handle

Safety instructions

Always observe safety instructions! This will prevent injuries and damage. Read this instruction carefully before using the vacuum cleaner. Save the instruction as a reference book.

- This model is intended only for dry cleaning. Do not use it to pick up water or other liquids.
- Do not immerse it into water.
- Do not use the vacuum cleaner to pick up flammable or combustible liquids (gasoline, cleaning fluids, perfumes, etc.), or use in areas where they may be present.
- Do not pick up burning or smocking cigarettes, matches or hot ashes.
- Use only manufacturers' attachments.
- This appliance is not intended for use by young children as a toy or by infirm people without supervision. Never leave an appliance unattended when it is switched on.
- Keep far from your face and eyes.
- Do not use the vacuum cleaner when some of its openings are blocked.
- Clean the filters of dust, hair and other things which obstruct normal air intake.
- Do not use without filters.
- To disconnect the appliance do not pull the cord, always take up the plug which is inserted into car cigarette lighter.
- While using make sure that the cord is not pressed between the car doors or windows.
- Do not use the appliance if it is damaged. Apply to the authorized service centres for repair.
- Always unplug the vacuum cleaner after

using, while cleaning and while changing the nozzles.

- Keep away from children. Before using, check if the vacuum cleaner or the accessories are damaged.

Electrical safety

- The appliance should be supplied from car on-board power system of 12V with grounded minus.
- Do not connect to the voltage with grounded plus or other voltage.
- Car cigarette lighter can be in current if the key is out of ignition. In this case see your car manual.
- Strip contacts voltage is not more than 12V that is it safe for the user.

Usage of the car vacuum cleaner

Remember!

- The best results can be achieved only when the filters are clean and the dust-box is empty.
- Before using make sure that the filter set is in the case of the dust-box.
- Do not use the vacuum cleaner, for over 30 minutes, because the charge of the car accumulator may be lowered. Unwind the power cord and put the plug into the car cigarette lighter.

Choose and connect the required nozzle to air inlet.

Small crevice nozzle

- Put the small crevice nozzle into the air inlet. Do not use the nozzle to pick up liquids.

Rubbish and dust removal

- We recommend removing rubbish and dust each time after the car cleaning.
- Turn off the vacuum cleaner with the switch and take out the plug from the car cigarette lighter.
- Hold the vacuum cleaner by the handle

with the dust-box down.

- Press the dust-box lock button and disconnect the dust-box.
- Take out the filter set from the dust-box.
- Turn down the dust-box and remove the rubbish and dust.

Attention Do not wash the dust-box with water, only dry cleaning is possible.

- Take off an clean from rubbish the netted filter.
- Insert the filter into the dust-box.
- Put the dust-box in position. To do this, connect the contacts at a small angle necessary to connect the lock, simultaneously press the dust-box lock button and fully close the dust-box. Release the lock button.

Cleaning of the filter set

Keep the filters clean as this ensures the vacuum cleaner efficiency. Clean the filters 3, 4 or more times a year. The filters are intended for multiple cleaning. If necessary the filters can be changed.

- Take off the dust-box and take out the filter set.
- Clean the filter from dust and wash it with warm water.
- Dry the filter before inserting them into the dust-box.

Attention

- Do not wash the filters in the dishwashing machine.
- Do not dry the filters with hair-dryer or other heated appliances.

Case of the vacuum cleaner

- Clean the case with a wet cloth.
- Do not permit liquid into the case.
- Do not use solvents or abrasive substances for cleaning.

TECHNICAL CHARACTERISTICS

Power supply:	DC - 12V
Power consumption:	60W
Cord length:	4,00 m

COMPRESSOR

READ CAREFULLY!

Unless directions are followed, physical injury or property damage may result.

When using the compressor, never leave it unattended.

1. Power required: 12 volts 10 amps. D.C.
2. This compressor is designed for occasional use only. Operation over an extended period of time will overheat the unit and damage the compressor. A sluggish operation of the compressor or if the exposed metal fittings get too warm to the touch should indicate to you that the unit has been operating too long and is overheating. When this occurs stop, the unit immediately and let it cool for approximately 10 min. before resuming operation.
3. This compressor is not designed for inflating high pressure tyres such as used on trucks, trailers or tractors.
4. When running at more than 75 PSI do not operate for more than 7 minutes.
5. You may use a 12 volt battery charger to power this compressor, but it must be rated at 14 amps or more to avoid damage to the compressor and for the charger.

TO INFLATE TIRES

1. Place connector on input valve stem (Fig.1) and push down. Close thumb latch connector (Fig. 2).

Caution: Make sure the connector always touches the core of tire valve stem.

Pic. 1

Pic. 2

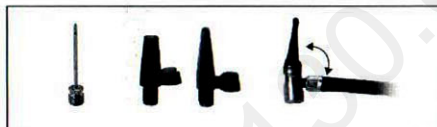

Pic. 3

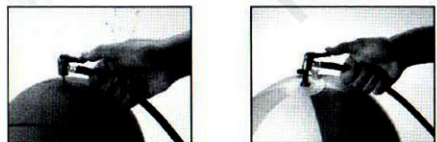

2. Plug power cord into cigarette lighter receptacle (Fig.3).
3. When proper pressure is reached, unplug power cord and remove connector.
4. Always leave the the thumb lock in the open position when storing the compressor.

FOR INFLATABLES

1. Select the suitable adapter and insert it into the connector (Fig.4).
2. Check our TYPICAL INFLATION PRESSURE chart. This chart is for reference only and you should consult your owner's manual for a more exact pressure rating.
3. Insert adapter into article to be inflated (Fig. 5).
4. Plug power cord into cigarette lighter receptacle (Fig. 3). Turn on switch.
5. When proper pressure is reached, turn off switch, unplug power cord.
6. Remove adapter from inflated article and remove adapter from connector.

Pic. 5

TYPICAL INFLATION PRESSURE

Avoid overinflating. NEVER EXCEED RECOMMENDED PRESSURE. The item being inflated may burst and cause serious injury.

TROUBLE SHOOTING:

Compressor does not start/blows fuses

1. Push the power plug firmly into the receptacle and twist it back & forth.

2. Check receptacle and plug terminals for dirt, particularly tobacco. Use a non conductive probe, not fingers or metal.
3. Check vehicle lighter fuse. Should be 15 amps minimum.

Compressor runs but does not inflate

1. Be sure the connector always touches the core of the valve stem.
2. Check article for leaks.
3. Check hose for breaks and leaks at fittings.

Compressor runs slowly

1. Overheated from excessive use. Shut it off and let it cool for 30 minutes.
2. Voltage too low. Check condition of battery.

Caution!

1. Do not over inflate items beyond their needs. Most car tires will inflate properly between 24 - 32 PSI depending upon tire the tire.
2. Keep out of reach of children.
3. Do not leave unattended.
4. Do not use while driving.

Technical data:

Rated voltage:	12V DC (direct voltage)
Rated current:	12 A
Air hose:	ca. 60cm
Maximum pressure:	250PSI / 17bar
Unload air flow:	10L/min

Guarantee

Thank you for having purchased this HEYNER-quality product.

All HEYNER-products are developed and manufactured according to highest technical and legal standards with permanent quality control.

We would sincerely regret, in case this product should not function accurately. Please contact your dealer to find out our local service partner.

Any warranty claims are only valid within the legal warranty period starting from the purchase date. They should be declared without delay and are strictly limited to repairing or replacing of the product. Warranty immediately becomes invalid in case of misuse or non respect of the instruction manual. As products are not to be sold in the USA or Canada, warranty is not valid for these countries.

Only for EC-Countries

After the implementation of the European Directive 2002/96/EU in the national legal system, the following applies: Electrical and electronic devices may not be disposed of with domestic waste. Consumers are obliged by law to return electrical and electronic devices at the end of their service lives to the public collecting points set up for this purpose or point of sale. Details to this are defined by the national law of the respective country. This symbol on the product, the instruction manual or the package indicates that a product is subject to these regulations. By recycling, reusing the materials or other forms of utilising old devices, you are making an important contribution to protecting our environment.

EU Statement of conformity

Hereby we declare that this commodity corresponds to the following EC directives for general requirements of safety and health

- Electromagnetic compatibility 2004/108/EC.

Auto-Reifen / Auto-Tire / Автомобильные шины	Bar	PSI
Für genaue Druckbestimmung benutzen Sie die Hinweise des Herstellers von dem aufzupumpendem Gerät. Please consult your owner's manual for a more exact pressure rating. Для точного выяснения нормы давления смотрите справочник изготовителя вашего изделия.	1,7 - 2,2	24 - 32
Stoßdämpfer / Shock-Absorber / Амортизатор	Bar	
Normale Ladung / Normal Load / Нормальный груз	2,8	40
Schwere Ladung / Heavy Load / Тяжёлый груз	6,2	90
Fahrrad-Reifen / Bicycle Tires / Велосипедные шины	Bar	
	2,4 - 2,8	35 - 40
Andere / Other Inflatables / Другие	Bar	
Fußball / Football / Футбольный мяч	0,9	13
Basketball / Basketball / Баскетбольный мяч	0,6	9
Volleyball / Volleyball / Волейбольный мяч	0,3	5
Rasentraktor Reifen / Lawn-Tractor Tire / Шины газонокосилки	1,5	22
Boot (2 Personen) / Boat (2 man) / Лодка (двухместная)	fest / fixed / крепко	
Matratze / Mattress / матрац	fest / fixed / крепко	

- ⚠ Achtung!** Aufblasbare Materialien nicht zu stark aufpumpen.
CAUTION! Soft inflatable material items will not have existing pressure reading.
 You must be careful not to over-inflate.
Внимание! У мягких изделий нет существующих норм давления. Вы должны быть очень осторожны, чтобы не надуть сильнее, чем надо.
