Art. 227000

Germany

2-Zylinder

KRAFTKOMPRESSOR 300W

Bedienungsanleitung

Achtung!

1. Bitte lesen Sie die vorliegende Anleitung sehr aufmerksam, um eine sichere Handhabung zu gewährleisten.
2. Das Gerät nur mit Handschuhen benutzen. Der Kompressor kann sich stark erwärmen. Die Nichtverwendung von Handschuhen kann zu Verbrennungen führen.

READ CAREFULLY!

Unless directions are followed, physical injury or property damage may result. When using the compressor, never leave it unattended.

1. Power required: 12 volts 30 amps. D.C.
2. This compressor is designed for occasional use only. Operation over an extended period of time will overheat the unit and damage the compressor. A sluggish operation of the compressor or if the exposed metal fittings get too warm to the touch should indicate to you that the unit has been operating too long and is overheating. When this occurs stop, the unit immediately and let it cool for approximately 30 minutes before resuming operation.
3. You may use 12 volt battery charger to power this compressor, but it must be rated at 30 amps or more to avoid damage to the compressor and for the charger
4. Do not use air inflator on high pressure tires such as those used on large trucks.

TO INFLATE TIRES

1. Place connector on input valve stem (Fig. 1) and push down. Close thumb latch connector (Fig. 2).

Caution! Make sure the connector always touches the core of tire valve stem.

Fig. 1

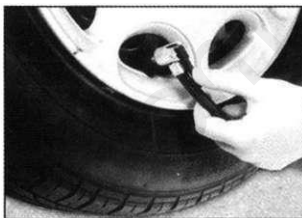

Fig. 2

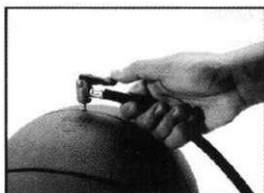

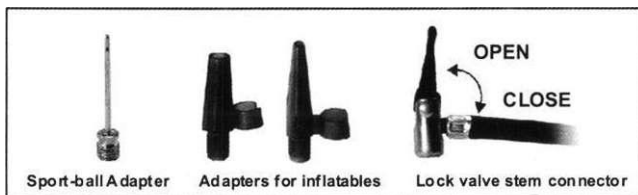

Fig. 3

2. Connect clips to battery poles (Fig. 3). _ of correct poles. Then set compressor ON/OFF switch to „ON" position.
3. When proper pressure is reached, set ON/OFF switch to „OFF" position, unplug the clips and remove connector.

FOR INFLATABLES

1. Select the suitable adapter and insert it into the connector (Fig. 4).
2. Check our typical inflation pressure chart.
This chart is for reference only and you should consult your owner's manual for a more exact pressure rating.
3. Insert adapter into article to be inflated (Fig. 5)
4. Connect clips to battery poles (Fig. 3). Turn on switch.
5. When proper pressure is reached, turn off switch, unplug the clips.
6. Remove adapter from inflated article and remove adapter from connector.

TYPICAL INFLATION PRESSURE

Avoid overrating. NEVER EXCEED RECOMMENDED PRESSURE. The item being inflated may burst and cause serious injury.

Auto-Tire	PS I	Bicycle Tires	PS I
	24 -32		35-40
Please consult your owner's manual for a more exact pressure rating.		Other Inflatables Football	PS I
		Basketball Volleyball	13 9 5
Shock-Absorber	PS I	Lawn-Tractor Tire	22
Normal Load	40	Boat (2 man)	solid
Heavy Load	90	Mettress	solid

Caution! Soft inflatable material items will not have existing pressure reading. You must be careful not over-inflate.

TROUBLE SHOOTING

Compressor does not start/blows fuses

1. Check the right connection of the clips to battery poles.
2. Check vehicle lighter fuse. Should be 30 amps minimum.

Compressor runs but doesn't inflate

1. Be sure the connector always touches the core of the valve stem.
2. Check article for leaks.
3. Check hose for breaks and leaks at fittings.

Compressor runs slowly

1. Overheated from excessive use. Shut it off and let it cool for 30 minute.
2. Voltage too low. Check condition of battery.

Caution!

1. Do not over inflate items beyond their needs. Most car tires will inflate properly between 24-32 PSI depending upon tire the tire. Some truck and racing bicycle tires require pressure in excess of 40 PSI. Other bicycle tires require substantially lower pressures.
2. Keep out of reach of children.
3. Do not leave unattended.

Item may be modified according technical progress.
