INSTRUCTION MANUAL

Features

- Semi-conductor cooling function.
- Without compressor, free noise and free CFC. Environment protection.
- Simple construction design, long time life span, convenient for repair.
- Small in size, light weight.
- Convenient for use, energy saving.
- Different power input options, can be used both in cars and in household.

Uses

- Car traveling
- Student dorm and dining hall
- Sport field
- Yacht and fishing
- Construction working place
- Car and truck
- Household small bar
- Low temperature medicine stored
- Open picnic
- Keep baby milk and food warm
- Lake—side banquet
- Food and beverage for taxi and car driver
- Keep fruit fresh

Directions to Use

1. Connect power supply
Different power input options. Please choose it according to the following instruction.
 - A. If use DC12V power supply. Just put power cord into interior car/yacht cigarette lighter hole directly.
 - B. If the machine with these two power supply, 12V and 24V. The user should use correct power supply.
 - C. Only the designs with AC power supply can be put directly by AC power cord.
2. Every machine with special power socket. One is connected with cigarette lighter, the other is connected with machine supply. It is forbidden for connect the machine with AC power directly.
3. The transfer switch with three functions. If put the switch at cold position, the green light will turn on and the machine begins cooling. If put the switch at hot position, and the red light will turn on and the machine begins to heating. If put the switch at off position, and the machine will turn off.
4. The power switch shall be put at STOP position for 5 minutes before changing the working made (from cooling to heating or from heating to warming).
5. Keep air flowing. Never block the ventilation hole.

Notes

1. When the cooler and warmer is on, it should be kept in a well-ventilated place, and shall not be kept in the boot of a car. To ensure easiness of heat dispersion. Operation under direct sunlight and disturbing air flow shall be avoided.
2. Don't pour water into this cooler and warmer directly. Don't rinse the body with water directly. A damp cloth is recommended.
3. Wipe it clean and dry before leaving it unused for a long time. Then put it at a well-ventilated place.
4. Violent bumping shall be avoided.
5. The fan will turn on and off automatically to in hot mode regulate the temperature.
6. Ventilation is essential to the operation of the cooler and warmer. The ventilation holes should never be blocked, and the item should be positioned so there is adequate air flow. Lack of ventilation will damage the device due to poor heat dispersion.
7. This item is good for indoor use, and temporary outdoor use, but must always be kept dry, and must always be plugged in indoors.

Troubleshooting

<p>The machine fail to work (The indicator lamp fail to light)</p>	<ol style="list-style-type: none"> 1. Check the power plug and socket for connection. 2. Maybe your cigarette lighter is out of power. Check the following: <ol style="list-style-type: none"> (1) Check the LED Light of cigarette lighter whether it is on or not. (2) If the light is off Check the fuse of lighter whether it is broken or not. (3) If the fuse is not broken Check the base of lighter to see whether the base has been covered with tobacco, which may cause poor contact. If so, clean the base with a non-metal brush and solution until the contact point at the center looks clear. If your power plug connected to the base is getting warm, it is resulted from dirty base or poor contact.
<p>Poor cooling result</p>	<ol style="list-style-type: none"> (1) If the machine has a poor cooling result and meanwhile the outside fan fails to turn, that means the fan have been damaged. In this case, please take it to a designated service center for repairing. Otherwise, the cooling device will be damaged. (2) If the machine has a poor cooling result but the outside fan still runs, that means the cooling device may have been damaged. In this case, please take it to a designated service center for repairing.

Special Attention

1. Semi-cooler and warmer is not a fridge , also not a ice box.
2. Regarding to the cooling function, after cool down the beverage, then cool into in kind of machine. The effect will be better. The warming function just suit for keeping the food warming.

Technical data

Model	Capacity (L)	Weight (KG)	CollingTemperature Max(Ambient temperature 25°C)	Heating Temperature Max	Power supply (choice)	Rated power (w)
